    CCNA CyberSecurity Operations.

2021

Elche, Alicante, Spain
Miguel Hernández University of Elche
    PCAP: Programming essentials in Python.

In progress

Cartagena, Murcia, Spain
-Technical University of Cartagena:
    Degree and Telematics Engineering.

Activities

My hobbies are developing web applications and developing solutions to everyday problems.

I like to stay on top of new news in the world of cybersecurity and technology.

I've developed video streaming projects in C#, designed a SoC for a specific function, a P2P file download program, and a web page with database and software recommendation algorithms in MATLAB.

Some FrontEnd works with different Frameworks and a Back-End with Angularjs.
